Professional Summary

Computer Science and Engineering student with hands-on experience building full-stack web applications using the MERN stack and Next.js with PostgreSQL. Comfortable working across the whole application: responsive user interfaces, REST APIs, SQL and NoSQL database design, authentication, and role-based access control. Built and published four full-stack projects with public source code, three of them deployed live. Analytical, adaptable, and quick to pick up new tools. Seeking an entry-level software or web developer role where I can contribute to real products, learn from experienced engineers, and grow into a strong professional.

Technical Skills

Languages	JavaScript, Java, Python, C, C++
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Backend	Node.js, Express.js, RESTful API Development, CRUD Operations
Databases & ORM	MongoDB, PostgreSQL, Prisma ORM
Authentication	Firebase Authentication, NextAuth.js, Role-Based Access Control (RBAC)
Tools & Deployment	Git, GitHub, Vercel, Firebase Hosting, Netlify
Core Concepts	Client-Server Architecture, API Integration, Database Design, Debugging, Version Control Workflows

Projects

BazarDB – *E-Commerce Platform* GitHub | Live Demo

- Built a full-stack e-commerce web application using Next.js with a PostgreSQL database managed through Prisma ORM.
- Implemented product search and filtering so customers can quickly find items.
- Added wishlist and customer review features to improve user engagement.
- Secured the application with NextAuth.js authentication and built an admin panel for managing the store.
- Deployed the application on Vercel with public source code on GitHub.

Technologies: Next.js, PostgreSQL, Prisma ORM, NextAuth.js, Vercel

Gentle Vibe – *Fashion & Lifestyle Shop* GitHub | Live Demo

- Developed an online shopping application with three separate workflows for users, managers, and admins.
- Built product management features, including adding, editing, and organizing products.
- Created a manager-facing POS billing feature for handling in-store sales.
- Integrated Firebase Authentication with a Node.js and Express backend and MongoDB database.
- Styled a responsive interface with Tailwind CSS and deployed it using Firebase Hosting.

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Firebase

Loan Management System – *Financial Platform* GitHub | Live Demo

- Built a comprehensive loan management platform for managing loan records and user activity.
- Implemented role-based access control so each user type sees only the features they are allowed to use.
- Added real-time financial tracking to monitor loan status and payments.
- Developed REST APIs with Node.js and Express, with data stored in MongoDB.
- Used Firebase for authentication and hosting.

Technologies: React.js, Node.js, Express.js, MongoDB, Firebase

HomeQuestBD – *Rental Property Platform* GitHub

- Developed a full-stack, web-based platform that simplifies finding and listing rental properties.
- Designed the database schema and data access layer using Prisma ORM.
- Built property listing and browsing flows with Next.js.

Technologies: Next.js, Prisma ORM

Education

Bachelor of Science in Computer Science and Engineering 2023 – 2027

Bangladesh University of Business and Technology (BUBT), Dhaka CGPA: 3.33 / 4.00

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

Experience

Self-Directed Full-Stack Development – *Personal and Academic Projects* 2024 – Present

- Designed, built, and deployed four full-stack web applications from database design to live hosting.
- Practiced the complete development workflow: planning features, building APIs, debugging, and version control with Git and GitHub.
- Maintained public repositories and a personal portfolio website to showcase work.

Professional Strengths

- **Problem solving:** analytical approach to finding and fixing technical issues.
- **Adaptability:** willing to learn unfamiliar tools and technologies quickly.
- **Independence:** able to work on assigned tasks and project goals without close supervision.
- **Code quality:** focused on writing understandable code and building usable applications.

Certifications & Achievements

- Participant, Intra Intake Programming Contest (IIPC), BUBT, 2024
- Participant, Hacktasyne 10-Hour Hackathon, BUBT, 2025
- Web Development Course, Programming Hero, 2025

Languages

Bangla (Native) | English (Professional Working Proficiency)
